Major Goals: The more we know about batteries, the less we take them for granted. The significant research and development of electrochemical energy storage systems have allowed for practical and theoretical descriptions of ionic transport in liquids, solids and across interfaces. Advanced in-situ and in-operando characterization techniques have helped us to gain understanding of fundamental processes in battery materials or battery devices revealing intricate connections between those processes and electrochemical performance.

We are now tasked with an even taller order than just understanding a battery: we have to make a battery so well that we can take it for granted and it becomes "invisible". The performance gains enabled by the above understanding has created consumer batteries that surpass current power and energy densities metrics while lasting longer, all at lower cost.

To meet this challenge and maximize the current opportunity within batteries we must come together as a community to integrate our knowledge across the entire community from Theory to Realization to Safety. This Batteries GRC focused on the big challenges and opportunities we have today utilizing all the information we have at hand and identifying the pathway forward. This requires the identification of still existing knowledge gaps, the transfer of information across different time and length scales, and the alignment with theory. This was done by looking at state-of-the-art in-situ and in-operando characterization techniques that featured new and upcoming techniques which can help close knowledge gaps. At the same time, we focused on theoretical perspectives on multiple length scales. In addition, strategies to improve existing battery concepts were discussed in the context of new materials and material designs as well as new energy storage concepts.

A daily poster session gave opportunities for scientific discussion and a Gordon Research Seminar preceding the meeting gave graduate students and postdocs the chance to present their view on big challenges and opportunities and advances in battery research.

Accomplishments: Report Uploaded

Training Opportunities: Speakers, discussion leaders, poster presenters and attendees simultaneously contributed to and benefited from the collective skills and experience shared throughout the conference.

Results Dissemination: The final program has been posted on the GRC website.

RPPR Final Report
as of 24-Sep-2018

Protocol Activity Status:

Technology Transfer: Nothing to Report

GORDON RESEARCH CONFERENCES

FINAL PROGRESS REPORT

Army Research Office
Batteries GRC

Grant Number W911NF-18-1-0113

February 25-March 2, 2018

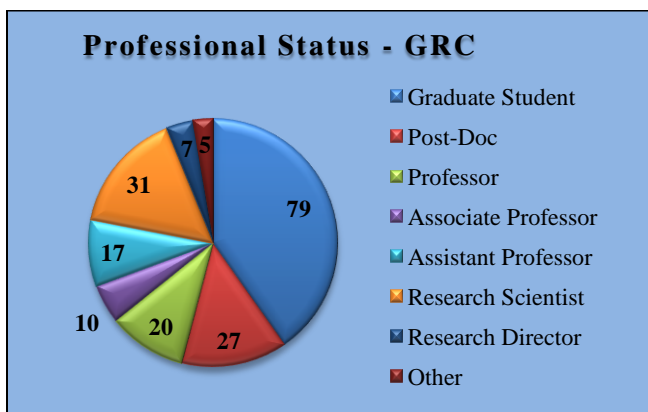

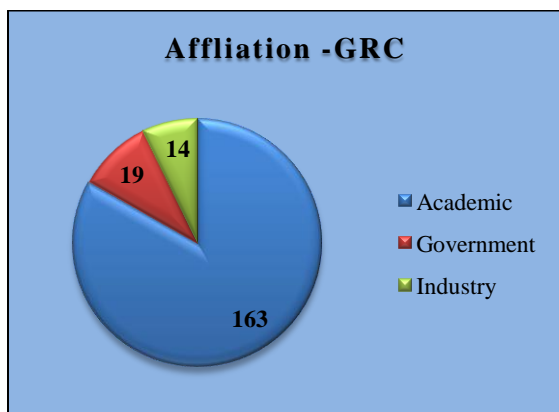

Operational Summary

The Gordon Research Conference (GRC) on Batteries was held at the Four Points Sheraton in Ventura, California from February 25-March 2, 2018. The meeting covered a variety of scientific topics and the content presented was highly rated by participants.

Conference Participants

The Conference was well-attended with 196 participants. Scientists from academia represented 83% of the participants while attendees from government accounted for 10% and those from industry totaled 7%. The meeting also attracted a strong mix of young investigators and senior scientists. Students and post-docs accounted for 54% of all attendees. Approximately 38% of the participants at the 2018 meeting were women.

Conference Program

The more we know about batteries, the less we take them for granted. The significant research and development of electrochemical energy storage systems have allowed for practical and theoretical descriptions of ionic transport in liquids, solids and across interfaces. Advanced *in-situ* and *in-operando* characterization techniques have helped us to gain understanding of fundamental processes in battery materials or battery devices revealing intricate connections between those processes and electrochemical performance.

We are now tasked with an even taller order than just understanding a battery: we have to make a battery so well that we can take it for granted and it becomes "invisible". The performance gains enabled by the above understanding has created consumer batteries that surpass current power and energy densities metrics while lasting longer, all at lower cost.

To meet this challenge and maximize the current opportunity within batteries we must come together as a community to integrate our knowledge across the entire community from Theory to Realization to Safety. This Batteries GRC focused on the big challenges and opportunities we have today utilizing all the information we have at hand and identifying the pathway forward. This requires the identification of still existing knowledge gaps, the transfer of information across different time and length scales, and the alignment with theory. This was done by looking at state-of-the-art *in-situ* and *in-operando* characterization techniques that featured new and upcoming techniques which can help close knowledge gaps. At the same time, we focused on theoretical perspectives on multiple length scales. In addition, strategies to improve existing battery concepts were discussed in the context of new materials and material designs as well as new energy storage concepts.

A daily poster session gave opportunities for scientific discussion and a Gordon Research Seminar preceding the meeting gave graduate students and postdocs the chance to present their view on big challenges and opportunities and advances in battery research.

Conference Budget

Funding provided by the Army Research Office supported partial registration for 4 professors and 1 assistant professor at the GRC.

Conference Feedback

Participants had an opportunity to provide feedback at the end of the Conference. The feedback collected from the meeting was extremely positive. Evaluations included numerous positive remarks regarding the diversity of speakers and topics, networking opportunities and the poster sessions.

GRC would like to thank the Army Research Office for its continued support of the meetings. The contributions received have been critical to the success of the conferences and are having a measurable impact in advancing the frontiers of science worldwide.

The Opportunity in the Invisible: Integrating Theory, Synthesis, Characterization and System Validation for
the Battery of Tomorrow
February 25 - March 2, 2018

Chair Nina Balke
Vice Chair Dan Steingart

Conference Program

Sunday

4:00 pm - 8:00pm	Arrival and Check-in
6:00 pm - 7:00 pm	Dinner
7:30 pm - 7:40 pm	Introductory Comments by GRC Site Staff / Welcome from the GRC Chair
7:40 pm - 9:30 pm	Beyond Li-Ion Batteries Discussion Leader: Venkat Viswanathan (Carnegie Mellon University, USA)
7:40 pm - 8:20 pm	Debra Rolison (U.S. Naval Research Laboratory, USA) "Architectural Design in 3D Physically Thwarts Dendrite Formation—With Zinc Batteries Now Rechargeable, What's Next?"
8:20 pm - 8:35 pm	Discussion
8:35 pm - 9:15 pm	M. Rosa Palacin (Institut de Ciència de Materials de Barcelona, CSIC, Spain) "The Long and Winding Road Towards Ca-Based Batteries"
9:15 pm - 9:30 pm	Discussion

Monday

7:30 am - 8:30 am	Breakfast
8:30 am - 9:00 am	Group Photo
9:00 am - 12:30 pm	Characterization and Quantitative Diagnostics Discussion Leader: Robert Kostecki (Lawrence Berkeley National Laboratory, USA)
9:00 am - 9:40 am	Erik Berg (Paul Scherrer Institute, Switzerland) "Development and Application of Online Electrochemical Mass Spectrometry for Li-Ion Batteries"
9:40 am - 10:00 am	Discussion
10:00 am - 10:30 am	Coffee Break
10:30 am - 11:10 am	Vanessa Wood (ETH Zurich, Switzerland) "How Should We Be Designing Separators?"
11:10 am - 11:30 am	Discussion
11:30 am - 12:10 pm	Hassina Bilheux (Oak Ridge National Laboratory, USA) "Characterization of Li Batteries Using Neutron Radiography and Computed Tomography"
12:10 pm - 12:30 pm	Discussion
12:30 pm - 1:30 pm	Lunch
1:30 pm - 4:00 pm	Free Time
3:00 pm - 4:00 pm	Power Hour

The GRC Power Hour is an optional informal gathering open to all meeting participants. It is designed to help address the challenges women face in science and support the professional growth of women in our communities by providing an open forum for discussion and mentoring.

Organizer: **Nina Balke** (Oak Ridge National Laboratory, USA)

4:00 pm - 6:00 pm Poster Session

6:00 pm - 7:00 pm Dinner

7:30 pm - 9:30 pm Insights from Industry

Discussion Leader: **Mary Patterson** (EnerDel, Inc., USA)

7:30 pm - 8:10 pm **Quinn Horn** (Exponent, USA)

"An Industry Perspective of Batteries"

8:10 pm - 8:30 pm Discussion

8:30 pm - 9:10 pm **Yan Wang** (Samsung Research America, USA)

"Solid Electrolytes Research in Industry"

9:10 pm - 9:30 pm Discussion

Tuesday

7:30 am - 8:30 am Breakfast

9:00 am - 12:30 pm Battery Reliability and Safety

Discussion Leader: **Jeff Dahn** (Dalhousie University, Canada)

9:00 am - 9:40 am **Hubert Gasteiger** (Technical University of Munich, Germany)

"Insights into Lithium-Ion Battery Degradation Mechanisms via On-Line Electrochemical Mass Spectrometry"

9:40 am - 10:00 am Discussion

10:00 am - 10:30 am Coffee Break

10:30 am - 11:10 am **Summer Ferreira** (Sandia National Laboratories, USA)

"Battery Failure from a Materials, Electrochemical and Thermal Modeling Perspective"

11:10 am - 11:30 am Discussion

11:30 am - 12:10 pm **Patrik Johansson** (Chalmers University of Technology, Sweden)

"Pure, Hybrid and Polymerized Ionic Liquid Based Electrolytes"

12:10 pm - 12:30 pm Discussion

12:30 pm - 1:30 pm Lunch

1:30 pm - 4:00 pm Free Time

4:00 pm - 6:00 pm Poster Session

6:00 pm - 7:00 pm Dinner

7:30 pm - 9:30 pm Multi-Scale Theory

Discussion Leader: **Alan West** (Columbia University, USA)

7:30 pm - 8:10 pm **Scott Roberts** (Sandia National Laboratories, USA)

"Modeling Mechano-Electrochemical Phenomena from the Mesoscale to the Macroscale"

8:10 pm - 8:30 pm Discussion

8:30 pm - 9:10 pm **Arnulf Latz** (German Aerospace Center, Helmholtz Institute Ulm, Germany)

"Pore Scale Resolved Simulations and Theory Based Modeling: Tools for Exploring the Inner Life of a Battery"

9:10 pm - 9:30 pm Discussion

Wednesday

7:30 am - 8:30 am Breakfast

9:00 am - 12:30 pm Solid Electrolytes

Discussion Leader: **Yan-Yan Hu** (Florida State University, USA)

9:00 am - 9:40 am **Nitash Balsara** (University of California, Berkeley, USA)

"Ohm's Law and Ion Transport in Solid Polymer Electrolytes"

9:40 am - 10:00 am Discussion

10:00 am - 10:30 am Coffee Break

10:30 am - 11:10 am **Erik Herbert** (Michigan Technological University, USA)

"Coupling Between the Mechanical Behavior of Lithium and Device Performance"

11:10 am - 11:30 am Discussion

11:30 am - 12:10 pm **Miaofang Chi** (Oak Ridge National Laboratory, USA)

"Microscopic Insights into Interfacial Ion Conduction in All-Solid-State Batteries"

12:10 pm - 12:30 pm Discussion

12:30 pm - 1:30 pm Lunch

1:30 pm - 4:00 pm Free Time

4:00 pm - 6:00 pm Poster Session

6:00 pm - 7:00 pm Dinner

7:00 pm - 7:30 pm Business Meeting

Nominations for the Next Vice Chair; Fill in Conference Evaluation Forms; Discuss Future Site and Scheduling Preferences; Election of the Next Vice Chair

7:30 pm - 9:30 pm New Battery Concepts

Discussion Leader: **Martin Winter** (University of Muenster, Germany)

7:30 pm - 8:10 pm **Yury Gogotsi** (Drexel University, USA)

"Multidimensional Materials and Electrode Architectures for High-Rate Hybrid Energy Storage"

8:10 pm - 8:30 pm Discussion

8:30 pm - 9:10 pm **Kang Xu** (U.S. Army Research Laboratory, USA)

"Making Batteries Safe and Flexible with Water"

9:10 pm - 9:30 pm Discussion

Thursday

7:30 am - 8:30 am Breakfast

9:00 am - 12:30 pm New Compounds for Energy Storage

Discussion Leader: **Ying Shirley Meng** (University of California, San Diego, USA)

9:00 am - 9:40 am **Veronica Augustyn** (North Carolina State University, USA)

"Layered and 2D Metal Oxides with Nanoconfined Fluids for Electrochemical Energy Storage"

9:40 am - 10:00 am Discussion

10:00 am - 10:30 am Coffee Break

10:30 am - 11:10 am **Guihua Yu** (University of Texas at Austin, USA)

"A Chemistry and Material Perspective on Lithium Redox Flow Batteries for Large-Scale Energy Storage"

- 11:10 am - 11:30 am Discussion
- 11:30 am - 12:10 pm **Magdalena Graczyk-Zajac** (TU Darmstadt, Germany)
"Challenges and Opportunities of the Highly Porous Silicon Embedded in the Carbon/Ceramic Matrix"
- 12:10 pm - 12:30 pm Discussion
- 12:30 pm - 1:30 pm Lunch
- 1:30 pm - 4:00 pm Free Time
- 4:00 pm - 6:00 pm Poster Session
- 6:00 pm - 7:00 pm Dinner
- 7:30 pm - 9:30 pm Microstructure Design
Discussion Leader: **Petr Novak** (Paul Scherrer Institute, Switzerland)
- 7:30 pm - 8:10 pm **Dean Wheeler** (Brigham Young University, USA)
"Variations in Microstructure and Conductive Properties of Porous Li-Ion Electrodes"
- 8:10 pm - 8:30 pm Discussion
- 8:30 pm - 9:10 pm **Gleb Yushin** (Georgia Institute of Technology, USA)
"Conversion-Type Active Materials and Processes for Safer, Higher Energy Density Batteries"
- 9:10 pm - 9:30 pm Discussion
- Friday**
- 7:30 am - 8:30 am Breakfast
- 9:00 am Departure
